PLATIN winter tyres 2026/27

**PLATIN
RP 70 Winter**
EXCELLENT HANDLING,
OPTIMISED GRIP AND
SAFE BRAKING ON
SNOW-COVERED ROADS

Cars winter

Profile with fixed rolling direction and optimised tread compound

Excellent handling, optimised grip and safe braking on snow-covered roads

Safe driving on wet roads

Outstanding handling and braking on dry roads

Lower fuel consumption and CO2 emissions

Available in 48 sizes, 14–19 inch

**PLATIN
RP 610 VAN Winter**
HIGH ECONOMY DUE TO
OPTIMIZED RUNNING
PERFORMANCE AND LOW
ROLLING RESISTANCE

VAN winter

Excellent traction and good braking performance on snow and ice

Short braking path in the wet and a low aquaplaning risk

Increased level of riding comfort due to a low level of road noise

High economy due to optimized running performance and low rolling resistance

Available in 10 sizes, 15–16 inch

EU tyre label

The EU tyre label helps consumers to decide in favour of a higher fuel efficiency class for their tyres. This can contribute to large reductions in running costs and emissions. Enhanced wet grip means greater road safety, and details of external rolling noise contributes to a reduction in traffic noise levels.

The actual fuel savings and road safety depend heavily on the behaviour of drivers, and in particular on the following:

- Eco-driving can significantly reduce fuel consumption
- Tyre pressure needs to be regularly checked to optimise fuel efficiency and wet grip.
- Stopping distances must always be respected.

Fuel efficiency class

Less rolling noise saves fuel and cuts CO₂. This property is assigned to classes A to E.

Wet grip class

Wet grip is assigned to classes A to E. Wet grip is crucial to safe driving. For instance, the difference between class A and class E braking distances is 18 m.

External rolling noise class

The label presents the volume in dB and the class A (quieter), B, or C (louder). The noise emitted by tyres affects the total noise levels emitted by the vehicle.

Snow grip

The snowflake symbol confirms that the snow tested tyre keeps within the 3PMSF limits (type approval).

**Best performance
in winter**
